

# Dr. Shoemaker's "Pyramid of Correction"

(In recent years, we have learned that you can intervene very early with VIP nasal spray)

## Things to Remember:

- HLA DRB1,3,4,5, DQB1 (done only once in a lifetime; it never changes)
- If you have a GENIE completed, you can potentially start VIP 2 weeks into MARCoNs Treatment
- MSH, this will be the first to go down and the last to go up
